Cooperation in the Best Interest of the Child

About children and MRI at Ryhov County Hospital Jönköping

Ewa Geel, Radiographer, Division of Medical Diagnostics X-ray department MRI section
Gunilla Yngve, Nurse Anaesthetist Department of Operations and Intensive care

Children and Anaesthesia at MRI in Jönköping

• Started 1989
• Patient age ranges from 3 months to adults
• Every Tuesday and Thursday (half day)
• Special MRI anaesthesia team
It is good nursing care to be able to implement several examinations in connection with anaesthetized MRI

- Eye examination eg manometry
- ENT, MIUS and plastic tubing, BRA
- Orthopedic joint injection usually Botox
- Dental examination
- Lumbal puncture, blood tests, allergy tests, vaccinations and change of PEG

All examinations that can be performed at the MRI anaesthesia room, without changing the choice of anaesthesia form or location, are possible to cooperate.
ENT examination

Knee joint injection
Eye examination

Blood tests

Numbers of Cooperations/child 2017

- 5 cooperations - 1 child
- 4 cooperations - 5 children
- 3 cooperations - 13 children
- 2 cooperations - 13 children
- 1 cooperation each of the remaining children
Our Vision with the Cooperation

• To implement several examinations in connection with anaesthetized MRI.

• To expand our cooperation with the Pediatric clinic and other departments and staffs involved with the children.

• To extend our way of working to other clinics both in-house and externally.

It’s all about children
Thank you for listening and welcome back to Jönköping.

Ewa Geel & Gunilla Yngve
